

# COMPANY PROFILE

Plan B Engineering is a Structural Engineering Design firm that specializes in temporary structures.

Our staff has extensive experience in the engineering and design of "Access Systems" (Scaffolds, Swings, Construction Hoists), "Construction Systems" (Temporary Enclosures, Rigging, Pedestrian Protection), "Building Stabilization Systems" (Shoring, Bracing, Jacking), and "Demolition Operations".

We strive to be cognizant of the various aspects that affect a structure and will work with all involved parties (Contractor, Owner, Architect, Engineer of Record, Detailers, and Permitting Agencies) to ensure an efficient and appropriate design and methodology.

Project collaboration is a critical part of the process and we share data easily utilizing our remote access and custom cloud services.

You will receive professional engineering advice, guidance, and recommendations for your design and construction needs from a staff that is licensed in every state of the U.S.

## Project Expertise

- Supported Scaffold
- Shoring and Bracing
- Hoist and Runback Platforms
- Demolition
- Suspended Scaffold
- Temporary Enclosures
- Historic Stabilization
- Rigging
- Netting
- Overhead Protection
- Safety and Access
- Jacking
